Kunwar Shaanjeet Singh Grover (2019101059)

Zeeshan Ahmed (2019111024)

## Changes made and Edits to our Original Mini-World

1. Cardinality Ratios: *We have used (min, max) constraints instead of the Cardinality Ratios (as in the documentation for Project Phase 1).*
2. Attributes of Match Description: *We have removed the two attributes of the relationship Match Description, namely Winner and Loser, since they have been already accounted for (and aptly so) as attributes of Matches.*
3. MVP as attribute to Match Performance: *MVP was already present as an attribute of Matches. Having it again as an attribute of the relationship Match Performance is redundant and can not be justified. Thus, it has been removed from Match Performance and is no longer an attribute of the same.*
