

Project Phase - IV

Final relational model

Minor Changes made from the end of the 3rd Normal form:

- "Name of the Hero" was renamed to "hero_name".
- "Name of the Hero" was renamed to "hero_name".
- "Teams" in match description relation were split into teams_1 and teams_2 to maintain atomicity rather than having them as a tuple.
- "Date of Joining" was renamed to "Join date".
- "Win rate" in player_characters was removed since that can be derived during queries.
